Professional Summary

Computer Science (AI & ML) undergraduate with hands-on experience developing AI-powered applications and scalable backend systems using Python, Django, React, and modern NLP libraries. Built an AI resume screening platform with semantic matching and ATS analysis, and currently developing an API monitoring SaaS. Interested in Software Engineering, Backend Development, and Artificial Intelligence.

Technical Skills

Languages: Python, Java, C, C++, SQL

Frontend: HTML5, CSS3, React.js, Streamlit

Backend: Django, Django REST Framework

Databases: PostgreSQL, MySQL

AI/ML: Sentence Transformers, Hugging Face Transformers, spaCy, scikit-learn, NumPy, pandas

Tools: Git, GitHub, VS Code, Plotly, REST APIs, JWT Authentication

Projects

HireSense AI – AI Resume Screening & ATS Analysis Platform

- Developed an AI-powered resume screening platform using semantic similarity and skill matching.
- Implemented ATS scoring using resume quality analysis, keyword matching, and AI-based candidate evaluation.
- Built a PDF parser with PyMuPDF and regex to extract candidate information.
- Created recruiter dashboards with Streamlit and Plotly for analytics and candidate ranking.
- Designed a modular Python architecture for maintainability and scalability.

API Monitoring SaaS (In Progress)

- Developing a SaaS platform for real-time API monitoring with uptime tracking and response-time analytics.
- Building secure REST APIs using Django REST Framework and JWT authentication.
- Designing a PostgreSQL database for monitoring history and incident tracking.
- Implementing automated health checks and notification workflows.

Education

Bachelor of Technology in Computer Science & Engineering (AI & ML)
ABES Engineering College
Expected Graduation: 2028

Certifications

- Cisco Networking Essentials
- Cisco Cybersecurity Essentials
- Cisco Packet Tracer
- NASSCOM EDA Certification
