Education

Raj Kumar Goel Institute of Technology (RKGIT)

Ghaziabad, India

Bachelor of Technology in Information Technology — SGPA: 7.05/10.0 (2nd Sem)

Sep 2024 – Sep 2028

- Relevant Coursework: Data Structures, Computer Organization & Architecture, Discrete Structures & Theory of Logic, Web Designing, Programming for Problem Solving, Cyber Security

Central Board of Secondary Education (CBSE)

Delhi, India

Higher Secondary Certificate (Science Stream) — Percentage: 66%

Mar 2022 – Apr 2024

Experience

Python Developer Intern

Jan 2026 – Present

SR INDIA - QSkill

Remote

- Developed data analysis pipelines using Pandas and Matplotlib for processing and visualizing datasets with statistical insights
- Built a linear regression model for house price prediction, implementing data preprocessing, feature engineering, and model evaluation techniques
- Created a Python-based matrix operations tool using NumPy for efficient mathematical computations and data transformations
- Gained hands-on experience in machine learning workflows including data cleaning, model training, and performance optimization

Open-Source Contributor

Jan 2026 – Present

Elite Coders - ECWoC'26

Remote

- Selected as active contributor in ECWoC 2026, a competitive open-source program focused on collaborative software development
- Contributing to real-world projects using Git and GitHub workflows including branching, pull requests, and code reviews
- Collaborating with distributed teams to implement features, fix bugs, and improve documentation for open-source repositories

Technical Skills

Programming Languages: Python, Java, JavaScript, C, HTML5, CSS3, SQL

Frameworks & Libraries: Flask, Flask-SQLAlchemy, Flask-CORS, Pandas, NumPy, Matplotlib, Chart.js, Jinja2

Tools & Technologies: Git, GitHub, VS Code, Postman, Notion, WeasyPrint, FPDF, Pillow, QRCode, Google Analytics

Database Technologies: SQLite, MySQL, MongoDB, Database Design, Database Modeling, Database Optimization, Query Optimization

Cloud & AI/ML: Google Cloud Platform (GCP), Google Cloud AutoML, Machine Learning APIs, Linear Regression, Data Preprocessing, Large Language Models (LLM), Generative AI, Prompt Engineering

Web Development: RESTful APIs, Full-Stack Development, MVC Architecture, Role-Based Access Control (RBAC)

Core Competencies: Data Structures, Algorithms, Algorithm Design, Object-Oriented Programming, Data Analysis, Data Visualization, Software Engineering, Cybersecurity

Projects

Railway Ticket Booking System | Python, Flask, SQLAlchemy, SQLite, FPDF, QRCode

Jul 2025

- Developed comprehensive railway reservation system with user authentication, train search, and intelligent seat allocation algorithm automatically assigning Confirmed/RAC/Waitlist status based on train capacity
- Built Flask-SQLAlchemy ORM models for User, Train, Route, Booking, and Passenger with secure Werkzeug password hashing and role-based access control for user and admin panels
- Implemented multi-parameter train search with filters for source, destination, and time preferences, plus dynamic fare calculation based on distance, class type, and passenger category
- Generated PDF e-tickets using FPDF with embedded QR codes containing PNR and booking details, plus admin dashboard for managing trains and viewing booking analytics

Invoice Generator Dashboard | Python, Flask, SQLite, JavaScript, Chart.js, WeasyPrint

Dec 2024

- Built full-stack invoice management web application with automated GST calculations (CGST/SGST/IGST) and PDF generation in 5 professional themes using WeasyPrint and num2words for currency conversion

- Designed normalized SQLite database with 7 relational tables handling business data, customers, items, and invoices with proper foreign key constraints and optimized queries
- Developed RESTful API endpoints using Flask for CRUD operations with comprehensive error handling and created interactive Chart.js dashboard for sales trends and profit analysis
- Implemented advanced search/filter functionality by invoice number, customer, date range, and value with responsive UI featuring light/dark theme toggle

Certifications

Google Cloud Platform: Prepare Data for ML APIs on Google Cloud — Store, Process, and Manage Data on Google Cloud - Command Line

Data & Analytics: Share Data Using Google Data Cloud — Get Started Using Google Analytics

Machine Learning: Introduction to Large Language Models

Additional Information

Areas of Interest: Full-Stack Web Development, Machine Learning, Data Analytics, Cloud Computing, Open-Source Development, Software Engineering, Cybersecurity

Soft Skills: Problem-Solving, Quick Learner, Team Collaboration, Leadership, Project Management, Analytical Thinking, Organization Skills

Languages: English (Fluent), Hindi (Native)
